

SOLARLOK

Interconnection System

Installation Manual

Installation Manual

1. Safety Note

- The SOLARLOK connector is to be used only to interconnect firmly fixed cables.
- **Do not disconnect under electrical load!**
- Electrical current path should only be disconnected using approved devices.
- Only cables released from TE Connectivity are permitted to be used with SOLARLOK component cable assemblies.
- SOLARLOK component cable shall be labeled with label PN 1718077-1 “Do not disconnect under load”.
- To protect against shock, ensure that conductors and their associated connectors are separated from opposite polarity components.
- Unconnected connectors **must** always be protected from pollution (e.g. dust, humidity, foreign particles, etc.), prior to installation. Do not leave unconnected (unprotected) connectors exposed to the environment. The usage of TE connector dust caps is strongly recommended.

- Connectors that are unmated in the field should also be protected from pollutants.
- Do **NOT** use any **oil or lubricants** during mounting.

2. Tools

(1) Stripping Tool	1.5 mm ² – 6.0 mm ² , 10 AWG	PN 4-1579002-2
(2) Crimping Tool	4.0 mm ² and 6.0 mm ² , 10-12 AWG	PN 1-1579004-2
(3) Extraction Tool	all terminals	PN 1102855-3
(4) Field Service Kit	all in one	PN 1534858-1

Installation Manual

3. Assembly Steps

- 3.1** Using the appropriate wire stripping tool, strip the wire **9 mm \pm 1 mm** without damaging the strands.

- 3.2** Insert the stripped wire into the terminal wire crimp barrel until it stops. While holding the wire in place, squeeze the crimp tool handles together until the ratchet releases.

- 3.3** Press the seal and cable pinch ring assembly into the connector housing until it stops. **If you use the pre-assembled connector kit, please go to 3.5!**

- 3.4** Screw back shell nut onto connector housing.

Installation Manual

Pre-Assembled (Connector Kit)

- 3.5** Push contact with cable into the connector housing until you hear the contact give an audible click and you feel the contact reach the end position. To verify contact engagement, give a slight gentle pull back on the cable, to be sure that the contact is locked.

“CLICK”

- 3.6** Tighten the cable screw lock. The initial assembly tightening torque is **1.3 + 0.2 Nm**. For this, a slotted socket wrench with wrench size 13 mm, is recommended.

4. Connector Mating

- When mating the SOLARLOK connectors, connectors labelled with a “+” or “-” are keyed and can only be mated with equally (same polarity) marked and keyed connectors.
- The connector system is fully latched only when the latches have clicked onto the mating connector.
- The “neutral” designated male connector incorporates no keying features and may be freely mated to either “+” or “-” keyed plug connectors. The neutral product should not be used when maintaining polarity is critical. It is only permitted for serial connections.

Replacement Contacts (screw-machined) for SOLARLOK System		
Wire Gauge Wire Size	Male Contact PN	Female Contact PN
2.5 mm ² 14 AWG	0-1987280-1	0-1987281-1
4.0 mm ² 12 AWG	0-1987280-2	0-1987281-2
6.0 mm ² 10 AWG	0-1987280-4	0-1987281-3

*HVT contact system

Maximum Operating Conditions

Max. system voltage:

1000V (for UL 600V), max. current 25A@85°C

Ambient temperature:

-40°C up to 85°C, (for UL 75°C) at full load

Please also refer to the following specifications:

Application specification 114-18488-1 as well as instruction sheets 411-18305-1 and 114-94061-1 to ensure correct connector assembly and crimp quality. For additional details, please refer to product specification 108-18701.

Installation Manual

Accessories: Dust Covers

Female Housing - Dust Cap	
PN	Package Quantity
1987424-1	100

Male Housing - Dust Plug	
PN	Package Quantity
1987419-1	100

The usage of connector re-usable dust covers until final assembly is strongly recommended. When the dust cover is mounted, the connector fulfils IP44 (dust and splash proof) according to IEC 60529.

Solar Cable

USE-2 Solar AWG Cable			
Wire Size	Color	Part Number	Quantity
14 AWG	Black	1986166-2	500
	Black	1986166-3	2500
12 AWG	Black	1986165-2	500
	Black	1986165-3	1600
10 AWG	Black	1986164-2	500
	Black	1986164-3	1000

This UV resistant cable can be used in the following photovoltaic applications:

- Between solar panels
- Between solar roof tiles
- Between panels and the AC/DC inverters

Approval:

- UL 854 approved 
- Approved for outdoor use

Material:

- Cable conductor is pre-tinned, stranded copper wire.
- Outside wire jacket provides a robust layer of protection and is UV resistant

Voltage:

600V

Temperature Range:

-40 °C – +90 °C
